

IOT WORKSHOP

HOW DO I GET RELEVANT DATA?

Sensor technology, recording and transmitting.

Turn your idea into reality! We will show you with which sensors and transmission technology you can collect the data necessary for your individual use case.

Enkom supports you with well-founded and field-tested knowledge in planning the right technology. Sustainability, functionality, resistance to the surrounding environment and security are the central design principles we follow.

One-day workshop
per use case

Workshop cost offered in
case of subsequent project
order

Documentation contains
architecture and technology
descriptions

Fixed price of CHF 2000.-
